DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1 - 10 in the reply filed on May 18, 2007 is acknowledged.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

3. Claims 4 – 10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4 – 10 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 – 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2616

For claim 1 line 5, the occurrence of “said setting means” is vague and indefinite because it is not known the metes and bounds of the claimed invention.

Claims 2 - 10 are rejected because they depend on a rejected claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ramanathan et al. (US 6,041,041).

For claim 1, Ramanathan et al. teaches a sending/receiving means which communicates with an external apparatus; a judgment means which judges whether this sending/receiving means is communicating through a connection-oriented connection; and a setting means which performs network address settings based on the judgment results of the judgment means (see column 5 lines 39 – 52 and 65 – 67, column 6 lines 1 – 7 and 20 – 25, and column 11 lines 10 – 17; the internet/intranet service system (ISS) communicates with other ISS or other user terminals and performs network address assignment. The ISS system also includes a firewall which judges whether TCP or non-TCP traffic is allowed through).

For claim 2, Ramanathan et al. teaches that the TCP/IP protocol is used in communication in the network (see column 5 lines 39 – 52 and 65 – 67, column 6 lines 1 – 7 and 20 – 25, and column 11 lines 10 – 17).

Art Unit: 2616

For claim 3, Ramanathan et al. teaches that the connection-oriented connection is TCP (see column 5 lines 39 – 52 and 65 – 67, column 6 lines 1 – 7 and 20 – 25, and column 11 lines 10 – 17)

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Umezu et al. (US 7,035,959 B2), Ceniza (US 2002/0186698 A1), Sato (US 2003/0012182 A1), Fuller, III et al. (US 2003/0036876 A1), and Peck (US 2007/0016659) are cited to show a measurement system and measurements method.
